	SoftSplint Padding™ Soft, pressure-sensitive padding is easy to apply. SoftSplint Padding™ consists of layered cotton and open-cell foam with adhesive backing. Combination of cotton and foam offers a comfortable texture and an effective lining. Use to line and pad splints or adaptive equipment. Clean with a damp sponge and air dry. Each sheet measures 1/16" (17mm) thick. Latex free.			
	1	SoftSplint Padding™ 15cm x 5.5m	R1 213.30	R 1 213.30
	1	SoftSplint Padding™ 23cm x 3.7m	R1 213.30	R 1 213.30
	Hapla® Adhesive Padding Two choices provide proven, long-lasting, hypoallergenic, fleecy padding. Fleecy Foam™ has a unique composite structure: polyurethane foam bottom layer with the added strength of a soft, needed, polyester fleecy upper layer. This soft, thin, open-cell foam is highly compressible and has instantaneous recovery that is ideal for cushioning over bony prominences. Air, moisture and vapor permeable to minimize skin maceration. HAPLA®-quality adhesive provides secure placement to splints or other supportive devices. Hapla® Adhesive Padding is sold in a package of four sheets. Fleecy Web™ is 100% cotton padding with a raised, fleecy surface. Ideal protection from chafing for sore and tender skin. Latex free.			
	1	NC12634 Fleecy Web™ 3mm x 23cm x 40cm, pack of 4 sheets	R1 929.59	R 1 929.59

		Comfortprene™ Splinting Material Offers creative splinting options while providing warmth, compression, cushioning and comfort. Comfortprene™ Splinting Material is a special selection of neoprene designed to meet the varying needs of clients. Cut out a splint pattern and make a flexible splint in a matter of minutes. No need for sewing or special machines. Iron-On Seam Tape and Iron-on Hook and Loop join pieces together and allow for quick fastening. Flexible support that conforms to fingers and body contours. Light to resistive support depending on the thickness of the material and the size of the area being splinted. Light to firm compression. Built-in cushioning to reduce pressure point complications. Minimal to moderate warmth. Lighter weight and less expensive than thermoplastic materials of comparable size. The terry-like plush liner feels soft and dry against the skin. Latex-free and machine-washable, air-dry material. 1/8" (3.0mm) for wrist, elbow and lower extremity splints. 1/16" (1.6mm) for hand and finger splints.

SCAR MANAGEMENT				
<div>   </div> <p style="text-align: center;">TopiGel® Silicone Gel</p> <p style="text-align: center;">Thin, translucent TopiGel® is ideal for reducing the size of new or old scars due to burns, trauma and/or surgery.</p> <p>TopiGel® Silicone Gel is a medical-grade, self-adhesive silicone sheeting that provides excellent conformity around contours for improved contact. Features one side with strong adhesive for good contact to the skin. This eliminates the need for tape, splints or bandages. The back side is coated so clothes or burn garments can be worn without sticking.</p> <p style="text-align: center;">Painless and easy to replace; will not lift or damage skin upon removal Cosmetically appealing, discreet, low-profile look. Hypo-allergenic and non-toxic. Indefinite shelf life.</p> <p style="text-align: center;">To apply, simply cut the sheet to fit the scar, peel off the protective backing and place on scar area. Effective up to six weeks with proper care. All products packaged individually in sealed pouches.</p> <p style="text-align: center;">Note: Not to be used on open wounds.</p>

STOCKINETTE

Stockinette

Stockinette is a tubular bandage manufactured from 100% unbleached cotton.
It is knitted with a tex 25 yarn with a tolerance of 10%
The rib knitting allows for excellent stretch and recovery.

Stockinette can be used for the following:

- Undercast padding
- Light compression
- Wound dressing

Stockinette is manufactured in the following sizes:
25mm, 50mm, 75mm, 100mm, 150mm, 200mm, 250mm and 300mm

The following lengths are available: 10m, 20m, 25m

	1	Stockinette 10m, ST091 – 50mm	R77.63	R 77.63

Alpha Tuffloc Velcro - Adhesive				
 <p>Made of nylon material. The loop materials are packaged in convenient 25meter rolls.</p> <p>Application Hook and loop consists of two parts, the hook or male part featuring tiny hooks, and the loop or female part consisting of even smaller and "hairier" loops. Hook-and-loop fasteners have been used for a wide variety of applications where a temporary bond is required. It is especially popular in clothing, bags and luggage where it replaces buttons or zippers.</p>

Norco® ROM Hinge Kits				
		Take the guesswork out of adjusting hinged, range of motion splints		
		Wrist ROM Hinge Kit: arms measure 4" and 2-1/4" (10 and 5.7cm) long. Weighs only 1 oz. (28g). Elbow ROM Hinge Kit: arms measure 7" (18cm) long arms joined at an axis point. Weighs only 2-1/2 oz. (71g). Hinges are constructed of 1/8" (3.2mm) thick, anodized aluminum. Indications: limited range of motion, post-operative indications, fracture bracing and post-cast management, soft serial splinting. Allen screws allow infinite adjustments from fully blocked to full ROM. Each adjustment represents a 20° change in ROM. Full ROM is possible with the screws removed. Wrist ROM Hinge Kit includes: (1) Hinge, (4) Allen screws with Hex bolts, (2) Allen screws, (2) Allen wrenches (2) Hex Wrenches and instructions. Elbow ROM Hinge Kit includes: (1) Hinge, (4) Allen screws with Hex Bolts, (2) Allen screws, (1) Allen wrench (1) Hex Wrench and instructions. Thermoplastic pieces not included. Note: May be used to create hinged pediatric elbow splints.

 MP1008-K	1	Oval-8® Kit P1008-K Stabilize and align finger IP joints to enhance hand function. Made of 1/16" (16mm), high-temperature polypropylene. Oval-8® splints can be adjusted with a heat gun for a small angle alteration. With a simple turn of the splint, each Oval-8® Finger Splint can be used to correct swan neck, boutonnière and mallet deformities, reduce lateral deviation and rest trigger finger. Oval-8® splints feature a wide, flat band for comfortable pressure distribution and control. Available in 14 sizes, each Oval-8® finger splint fits both a full and a half ring size. The economical Oval-8® Kit includes 44 splints in sizes 2 through 15, carrying case, pen light and instructions. Packaged with most splints in the more commonly used mid-range sizes. Sizes correspond to jeweler's ring sizes, though correlation may vary due to swelling or joint changes.	R11 890.25	R 11 890.25

	1	Urias® Air Splint Accessories - Hand Pump Pressure Gauge NC13025 Hand Pump Pressure Gauge is a combination gauge/hand pump that allows the user to inflate and monitor the pressure of the splint at the same time. Able to add/release pressure and detach it without loss of air from the splint when finished.	R6 103.19	R 6 103.19
Comfort Cool® D-Ring Wrist Orthosis Cool, lightweight support provides cumulative trauma relief. Comfort Cool® D-Ring Wrist Orthosis is made of 1/16" (1.6mm) perforated neoprene and lined with terry cloth. Provides excellent support without excessive bulk or warmth. Aluminum volar support is pre-bent for 15° wrist extension and can be removed for fitting adjustments. Circumferentially designed with double-layer cotton stockinette under D-ring closures provides comfort and easy application. Anti-Microbial and is not made with natural rubber latex. Available in two lengths: Short 7" and Long 9" To size, measure wrist circumference.				
  <i>D-ring closures make this splint easy to don and doff.</i>	1	Comfort Cool® D-Ring Wrist Orthosis, NC52960, X-Small, 13 to 15cm, Left	R607.13	R 607.13

Comfort Cool® D-Ring Thumb & Wrist Orthosis Thumb tip can be trimmed to allow full thumb movement. Comfort Cool® D-Ring Thumb & Wrist Orthosis protects and supports the entire thumb and wrist for conditions such as arthritis, tendinitis, sprains, strains, skier's thumb, gamekeeper's thumb, de Quervain's, wrist instabilities and post-surgical repair. Made with perforated neoprene with terrycloth liner that helps keep skin dry. Neoprene can be trimmed for a more custom fit and will not fray. Metal volar wrist stay is pre-bent to position the wrist in functional extension (approximately 15°). Volar wrist and thumb stays can be bent to conform as needed and can be removed as the condition improves. Made with 1/16" (1.6mm) thick material and comes in both Short and Long lengths. Short measures 6-7" (15-18cm) in length, Long measures 8-9" (20-23cm) in length. Firm features multiple stays that provide greater immobilization of the thumb and wrist, and is made with 1/8" (3.2mm) thick material. The two additional dorsal stays prevent unwanted flexion and extension. Available in Short length. Anti-microbial and is not made with natural rubber latex. To size, measure palm circumference.

	Posterior Leaf Splint Low profile for patient comfort. This lightweight AFO is designed to assist ambulation for those patients suffering mild to moderate neurological deficit resulting in drop-foot. Fits inside most lacing-up shoes. Assists flexion toward the back during ambulation. Can be trimmed using casting scissors and heat gun. The 2" (5.1cm) wide heavy-duty Velfoam® strap provides a firm, comfortable fit. Sizing corresponds with U.S. shoe sizes.
