EXERCISE BAND & TUBING				
<p>Sanctband</p> <p>Resistive Band is a natural latex resistive exerciser and resistance training device. It is suitable for all fitness levels and can be incorporated in many exercise regimes.</p> <p>Sanctband Resistance Exercise Band is colour-coded to indicate the resistance levels and strengths for physiotherapy, rehabilitation, sports therapy and training.</p> <p>The resistive exercise band is an effective and integral part of the concept resistance training. Resistance Training is a concept adopted in areas of physiotherapy, rehabilitation, sports training, Yoga and Pilates. It is also an effective training method used in sports training and rehabilitative exercises programs.</p> <p>Sanctband Powder Free and Reduced Protein Exercise Bands are developed to address the uncomfortable feeling of using powdered bands and concerns of latex allergy when using a latex band.</p>

TWIST & BENDS				
<div>  <p>CanDo Twist-n-Bend Exercisers</p> <p>The CanDo flexible hand bar exerciser is a lightweight, portable exerciser designed to strengthen muscles in the hand, wrist and shoulder. Also promotes coordination and increases range-of-motion. The bar is a perfect size for twisting and bending it. Perform oscillation movements for neuromuscular and balance training. Use for soft tissue and joint mobilization. The 12 inch long rubber bar utilizes the same graduated progressive color code as other CanDo products (tan - xx-light, yellow - x-light, red - light, green - medium, blue - firm, and black - x-firm). Consistent bar diameter and length throughout resistances means you use the same muscles with each resistance.</p> </div>

<div>   </div> <p style="text-align: center;">Norco™ Hand Exercisers</p> <p>For light resistance, loop a single rubber band around the top bar of the sliding finger grip. Attach additional rubber bands to increase resistance. Five rubber bands are included, each providing approximately 4 lbs. (1.8kg) of force. For even greater adjustability, try the Deluxe Hand Exerciser. Two metal thumb screws may be adjusted to change the length of pull to best fit hand size or desired range of motion. The foam hand grip offers increased comfort. Note: The wider the hand, the greater the resistance</p>

Fast and Effective Nebulization: With compression technology, ONEPro guarantees quick and efficient nebulization of various medications (excluding hyaluronic acid). It's the ideal device for any type of use, offering versatility in managing your health. Minimal Residual Volume: The result is a remarkably low residual volume of ≤0.1 ml, which minimizes medication wastage and maximizes therapeutic efficacy. <u>Technical Data:</u> <ul style="list-style-type: none"> Power Feeding: USB port input 5V, 1A from external power feeding Power Consumption: 2.0 W Neb-Rate: 0.22 mL/min MMAD (Mass Median Aerodynamic Diameter): 1.51 µ Respirable Fraction (< 5 µm): > 93% Duty Cycle: Non-stop Noise Level: ≤ 35 dB (A) Weight: 18.0 g Size (Main Unit): 5.9 x 4.6 x 3.4 cm Package Includes: ONEPro Nebulizer, USB cable, Two adapters (USB-C and Lightning), User Manual ONEPro Nebulizer is not just a device; it's a lifestyle upgrade. Embrace the freedom to receive therapy anywhere, anytime, with maximum convenience and high therapeutic quality. The future of aerosol therapy is here, and it's called ONEPro.	R1 105.78	R 1 105.78
 SA-SPRP	1	Spirometer 3-Ball-in-1 Upper Respiratory Exerciser Cami Pulmogain Spirometer Pulmo-gain is a single patient respiratory exerciser to train respiration through deep inspiration. Triple chamber: 600-900-1200 cc/sec. Different colours of the three spheres to identify three different flow values of each chamber Made of shock-resistant material Can be completely disassembled to clean every single part External Air filter can be replaced easily at any moment Pulmo-gain is PVC free and non toxic	R162.55	R 162.55
	1	Flutter (Bronch-u-Vibe) The Flutter Device (known locally as the Bronch-u-Vibe) is an easy to use medical Device that is used by people with respiratory conditions to help loosen Mucus Secretions (Phlegm) in the chest, Reduce Dyspnea, as well as improve overall lung capacity. When the user Breathes out through the device it causes a small ball at the opposite end to vibrate, this in turn creates a resistance that helps to splint the airways open and loosens phlegm from the sides of the airways. This device can be used at home by People with the following conditions <ul style="list-style-type: none"> Asthma Atelectasis Bronchitis Bronchiectasis Cystic Fibrosis Deep Breathing Exerciser for comprehensive respiratory fitness. Chronic Obstructive Pulmonary Disease) COPD 	R351.90	R 351.90

	2	Mediflo Duo Spirometer The Mediflo Duo Spirometer is a respiratory exerciser for inspiration exercises (SMI) and expiration exercises (PEP). With just a few adjustments it can be transformed from a respiratory exerciser for inspiration exercises (SMI) to a trainer for expiration exercises (PEP). Breathing out against resistance increases intrapulmonary pressure and not only reduces tracheobronchial collapse with unstable bronchial systems but also improves the transport secretions. Advantages of the Mediflow Duo Spirometer as SMI Trainer: Comfortable and simple adjustments of the resistance to flow by turning the cap. Thus easily adjustable to the performances of the patient Motivating for the patient because of noticeable improvements in performance Safe because of the one-ball system, thus the patient is in control Safe because of the low starting value for flow and work of breathing Advantages of the Mediflow Duo Spirometer as PEP Trainer: Safe because of the floating indicator, showing a PEP pressure of 12 to 15 cm H2O. This makes it very easy to operate Comfortable and simple adjustment of the resistance to flow by turning the cap. Thus easily adjustable to the performance of the patient	R1 261.67	R 2 523.33

	1	Littmann Classic III – Black – Stainless Steel Stethoscope Discover the 5620 Littmann Classic III – Black – Stainless Steel Stethoscope, a breakthrough in stethoscope technology. As the latest iteration in the renowned Littmann series, this brand new model sets a new industry standard, perfect for those looking to buy a stethoscope that's both innovative and reliable. Featuring a versatile dual-sided chestpiece with tunable diaphragms for both adult and pediatric assessments. The single-piece diaphragm is easy to attach and clean, designed for optimal hygiene and maintenance. Convert the pediatric side to a traditional open bell with a non-chill rim for diverse patient care. Next-generation tubing offers enhanced durability, resisting skin oils, alcohol, and staining. Small diaphragm ideal for pediatric, small, or thin patients, and effective in carotid assessments. Perfect for various environments, including medical offices, general care units, and urgent care clinics. Customize your stethoscope with a range of vibrant colors to match your personal style. Soft-sealing eartips and a non-chill bell sleeve ensure patient comfort and optimal acoustic performance. Made in the USA, latex-free for safety and environmental consciousness.	R2 990.00	R 2 990.00
	1	3M Littmann Lightweight II S.E. Stethoscope Lightest weight of all Littmann adult stethoscopes at just 118 grams. Dual-sided chestpiece provides versatility of both a tunable diaphragm and open bell. Teardrop-shaped chestpiece for easier positioning under blood pressure cuffs and around bandages. Tunable diaphragm: Hear high or low frequency sounds by slightly adjusting pressure on the chestpiece. Soft-sealing eartips provide an excellent acoustic seal and comfortable fit. Latex free	R1 750.00	R 1 750.00
HOT / COLD THERAPY				
Relief Pak Heating Units Relief Pak Heating Units have the capacity to hold and heat various moist heat packs up to 175 degrees in an insulated hot water bath dependant on the chosen size. Moist heat and moist heat packs help treat acute and chronic pain, relieve aches and ease soreness and stiffness. They are ideal for recovery use post-injury and post-workout with a material that conforms to any body part and is pliable when heated. Moist heat is also more effective in deeper tissue heating and penetrates further than dry heat at the same temperature. This heating unit has an adjustable temperature control and features a glowing orange light that illuminates when the unit has reached its desired temperature. For best results, use moist heat packs at 160 degrees. The unit's compact stationary design allows it to easily sit on countertops. This heater runs on 220V. Comes with a removable plug set and fully illustrated user manual. Made from durable stainless steel that's perfect for high traffic clinics. The unique insulated design retains heat and prevents the exterior from becoming too hot and burning users. The on/off switch glows green when the unit is in use. Once drained, the unit is easy to clean. Use a soft cloth, sponge or non-abrasive cleaning pad to wipe down the unit and mild soaps and non-abrasive detergents to clean the surfaces. Do not use steel wool, bleach or cleaners with high chlorine contents. Versatile Relief Pak Heaters and Moist Heat Packs are designed for use at home or in multi-user environments. That's why they're highly recommended by physiotherapists, physicians, chiropractors, athletic trainers and kinesiologists.

 X76356	1	ThermX Thermal Shoulder Support Experience natural pain relief without medications with the ThermX Thermal Compression Support. This reusable support is intelligently designed to harness the power of hot or cold therapy, offering you a versatile solution to alleviate discomfort. Its wearable design, adjustable strap, and expert-grade gel make it a reliable companion for those seeking a drug-free pain relief method. <u>Key Features:</u> Completely Wearable Design: The ThermX Thermal Compression Support is thoughtfully designed to be worn comfortably throughout the day. Its ergonomic shape ensures a snug fit that won't impede your daily activities, allowing you to move with ease. Adjustable Strap: We understand that everyone's shoulder is unique, which is why our support features an adjustable strap. This feature lets you customize the level of compression, providing the perfect fit for optimal pain relief. 100% Heating/Cooling Coverage: Our support offers complete heating or cooling coverage for your shoulder area. Whether you prefer the soothing warmth of heat therapy or the refreshing coolness of cold therapy, ThermX has you covered. Light but Firm Compression: Strike the perfect balance between comfort and support with our light but firm compression. This feature ensures that your shoulder muscles receive the right amount of pressure for effective pain relief. Expert-Grade Gel, Safe and Non-Toxic: The gel used in our support is of the highest quality, expertly crafted to provide safe and non-toxic therapy. Rest assured that you are getting a product that prioritizes your well-being. Relieves Pain Naturally: Say goodbye to reliance on medications for pain relief. The ThermX Thermal Compression Support leverages the power of hot or cold therapy to naturally soothe sore muscles and reduce discomfort. Flexible Form-Fitting Design: We understand the importance of comfort, which is why our support boasts a flexible, form-fitting design. It conforms to the contours of your shoulder, delivering targeted therapy where you need it the most. Fits Both Left and Right Shoulders: Whether you experience shoulder pain on your left or right side, the ThermX support is designed to accommodate both, providing relief no matter which shoulder needs attention. Deluxe Cuff Ankle and Wrist Weights				
 <p>Easy to put on, adjust and wear.</p> <p>Meant to be worn, the weights are portable and can be used during any type of workout. Strong, durable hook and loop fasteners PLUS an extra-long loop strap with extra hook tabs ensure a secure and comfortable fit that won't slip, allowing users to exercise in confidence. This same extra-long loop strap allows for firm closure on ankles, wrists and larger areas such as thighs. Built to last, Cuff products are durable and made of easy to clean vinyl. Deluxe Cuff offers 16 ankle and wrist weights ranging from 0.5 kg. all the way up to 12.5 kg., making them versatile for all strength levels. This is the Cuff that weighs 3 kg. Multiple weight options mean workouts are adjustable, customizable and personalized. Cuff weights are so comfortable and convenient, you can even wear them under clothes. Heavy-duty materials and double stitching ensure the weights hold up even after the toughest of repeated workouts. The Cuff features grommets, great for hanging on any peg-board weight racks, making it a must-have addition for home gyms, clinics and fitness centers. Easy to clean, with a sponge or clean cloth and soapy water. Simply wipe off the vinyl to remove dirt.</p>

<div>  </div> <p>Rubber Hexagon Dumbbell 1Kg-50Kg [Each]</p> <p>These Hexagon dumbbells are sold as single units, and not as a pair.</p> <p>Rubber Hexagon Dumbbells are quite popular especially for Cross Training, Functional training, and Strength Training. Often people prefer round dumbbells as you can push dumbbells around with your feet. This is not the right way to transport dumbbells. Dumbbells should always be picked up and never rolled around or dropped. Hexagon dumbbells are used like normal round dumbbells, but it does allow you also to do pushups with the hexagon dumbbells. The hexagon dumbbells will ensure that the dumbbells don't move around during use.</p>

<div>  <div> CanDo® Inflatable Round Exercise Balls <p>Exercise balls are used to improve balance, coordination, flexibility, strength and even just for fun. Balls are used as aids for vestibular movement and equilibrium therapy, by fitness professionals as an aid for stretching and strength programs, as seats, and even by pregnant women in birthing classes.</p> <p>The CanDo® balls have a non-slip PVC vinyl surface that is ribbed for extra security. The balls may be "under" inflated to give a soft, mushy feel or fully inflated for a firm, bouncy feel. Standard CanDo® inflatable balls can support up to 300 pounds (136 kg) Available in various sizes.</p>  </div> </div>

  KIN4621009002	1	KINETEC KINEVIA DUO™ The intelligent exercise therapy system for upper and lower limbs, featuring a wide range of exercise modes and benefits for the user. Please note the Kinevia Duo is held in our French warehouse and is subject to a 3 week lead time. A choice of exercise modes You are able to choose from various exercise modes, including: Passive: a gentle and motor-driven mobilisation of the muscles and joints. Ideal during the warm-up phase, it will also reduce spasms and tension. Assisted: the device will support the exercise training to mobilise even the weakest residual muscle strength. This mode will provide a continuous movement whether passive or active. Active: the 20 levels of resistance will ensure a progressive strength and muscle training to the patient. Innovative and intuitive This unique system comes with a number of innovative specifications, including: Tool-free adjustment, including quick adjustment of the pedals and a safety height adjustment feature. The high-quality transport wheels stable wheels with ball bearing allow for easy transport of the Kinevia, even over asphalt. 5 year warranty Physical exercise is an expression of personal freedom. Repeated, frequent and consistent movements, whether performed directly by the patient or through a device, have proven to help recover the functional abilities and capacities leading to an improved well-being and independence of the individuals. This includes: Maintaining and building muscle strength Regulating muscle tone and reducing spasms Preventing joint stiffness and adhesions Stimulating metabolism and blood circulation	R208 382.30	R 208 382.30
